

TMBO Lounge Chair

Designed by Magnus Læssøe Stephensen in 1935

Art no: 10301-10366

1935 is the date on the first draft of this sofa by the renowned multitalent and Danish architect Magnus Læssøe Stephensen, which have now been revived under the name TMBO. The TMBO series was designed in a shape that, in the laid-back confident attitude, celebrates life with the same dramatic simplicity that Magnus Læssøe Stephensen found in Japanese design tradition. The TMBO Chair and sofa alike, with the significant curved form, send a promise to hold your back whilst you lean back and enjoy the ride into the future.

General information

DESCRIPTION TMBO is a series of full upholstered furniture with seat and back in 2 separate parts. The back is made from laminated molded veneer, the shell is 12 mm thick.

VERSION Fully upholstered in fabric/leather.
Base/legs: Solid oak wood.

PRICE GROUPS 1 to 6
Sheepskin
COM

WEIGHT—TOTAL	31 kg
NUMBER OF PARCELS	1 pcs. / colli
FULLY UPHOLSTERED FABRIC CONSUMPTION W X L	Chair fabric: 140cm x 400cm Chair leather: 6m2

Cleaning & maintenance

CLEANING For cleaning the upholstered surface, first try to brush off the dirt gently. If this is not enough, then vacuum the surface. If further cleaning of the upholstery is needed, a stain remover is recommended. The cleaning must be gentle and must always be tested on the most invisible area of the surface before the actual cleaning. Avoid blotches by gentle, circular rubbing towards the stain. To avoid stains, quickly remove the dirt with a piece of absorbing household wipe and clean with water and colourless washing-up liquid. Do not use the following products for the padding:

- Undiluted cleaning liquids.
- Bleach.
- Ammoniac.
- Soap for hard surfaces.

For dusting and light cleaning of the frame use a soft, dry cloth. For further cleaning of the frame, use a soft cloth that is firmly wrung in clean water for gently wiping the surface, and then immediately use a dry cloth to wipe the surface again. Do not use materials for maintenance that:

- Contain abrasive agents.
- Are basic, acidiferous, or organic.

For the best maintenance of the product, protect it against sunlight and heat, and try to keep it away from moisture, grease, and other dirt. Furthermore, protect the surfaces against sharp objects and other that might scratch

MAINTENANCE We recommend to re-oil once a year.
